

From Vulnerable to Vigilant: Is your organisation cyber ready?

Friday, 4 July 2025

10:00am - 12:00pm

The cyber threat landscape is evolving faster than ever. For many organisations, undetected vulnerabilities continue to slip through the cracks while their internal security postures remain unclear, fragmented, or outdated.

This webinar will examine the underlying causes of persistent cyber security breaches, highlight commonly overlooked gaps, and how to move from reactive defense to proactive resilience.

Discover how to assess your risk exposure and build resilience with smart, practical strategies tailored for today's dynamic threat landscape.

What You'll Gain

- ▶ Understanding the cyber threat landscape and its implications for organisations today
- ▶ Practical insights on how to assess and strengthen your security posture
- ▶ How to mitigate cyber risks, such as live threat detection, vulnerability scanning, health checks, and integrated risk protection
- ▶ Overview of BDO's Managed Vulnerability Services powered by StarSentry and interactive Q&A with our experts

Speakers:

Raymond Lim

Executive Director, Technology Advisory, BDO in Malaysia

With over 30 years of expertise in IT infrastructure, cyber security, governance, solutioning and project management experience, Raymond Lim has a proven track record of leading large-scale and national-level projects. An ISO/IEC 27001:2022 Lead Auditor, PRINCE2 Practitioner, Certified ScrumMaster and Practitioner CQI, Raymond is well-versed in designing cutting-edge automation solutions tailored for mid-to-large organisations and enhancing efficiency, scalability and operational performance.

Fong Choong Fook

Executive Chairman and Founder of LGMS

Fong Choong Fook is the Founder and Executive Chairman of LGMS, Malaysia's first listed and most trusted cyber security service company, widely recognised for its comprehensive offerings spanning penetration testing, cyber risk compliance, digital forensics, and incident response. A former White-Hat Hacker, Fong is an internationally recognised speaker known for his engaging presentation style, blending deep technical insight with humour and enthusiasm. His expert commentary on hacking and cybercrime has been featured across television, radio, magazines, and industry conferences.
